Pathfinder

Veteran career transition web application

Problem: helping military members prepare for civilian careers.

GenAI interprets experience, explains options, and drafts civilian resume.

Exploratory guidance; the veteran decides.

Supply → Inventory control

PROBLEM IDENTIFICATION · CIS 8600

The veteran employment ecosystem

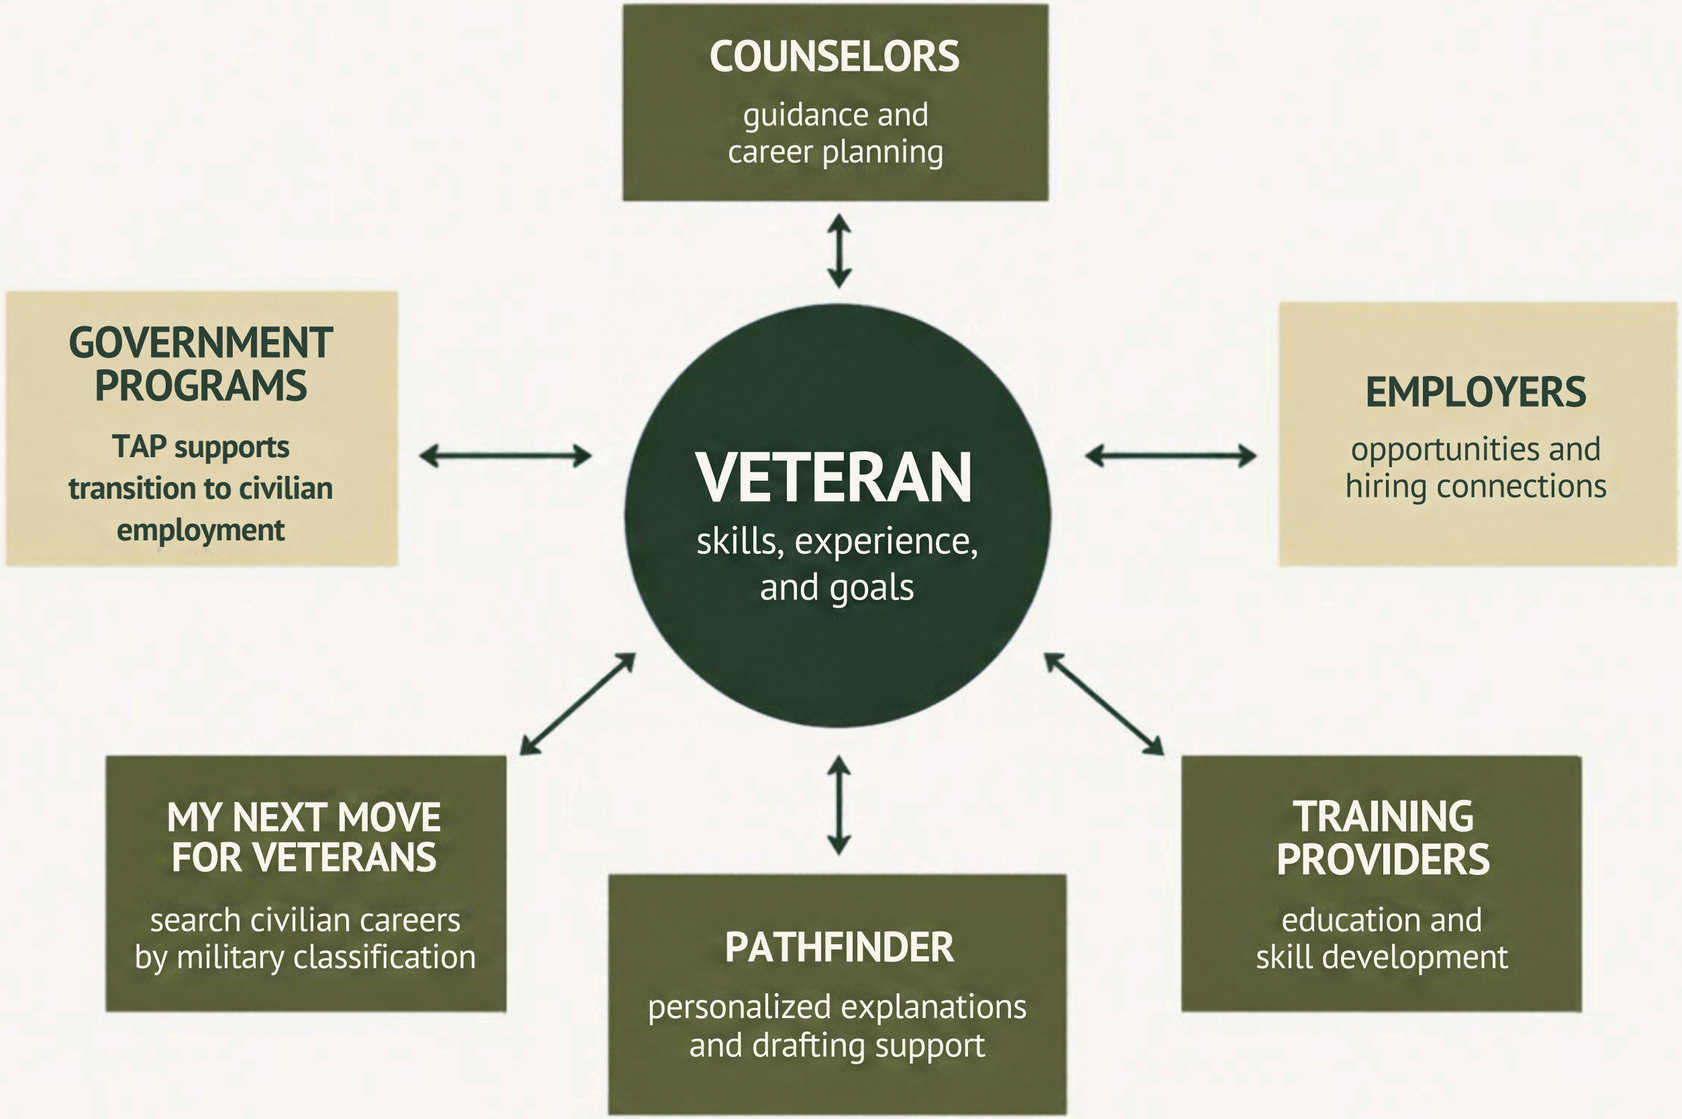

Workforce development connects service members, counselors, employers and training providers.

Transition Assistance Program supports preparation for civilian employment.

My Next Move for Veterans searches civilian careers by military classification.

Pathfinder adds a proposed personalized explanation and drafting layer.

Complements existing resources; no official affiliation.

Solution approach and project life cycle

SOLUTION APPROACH

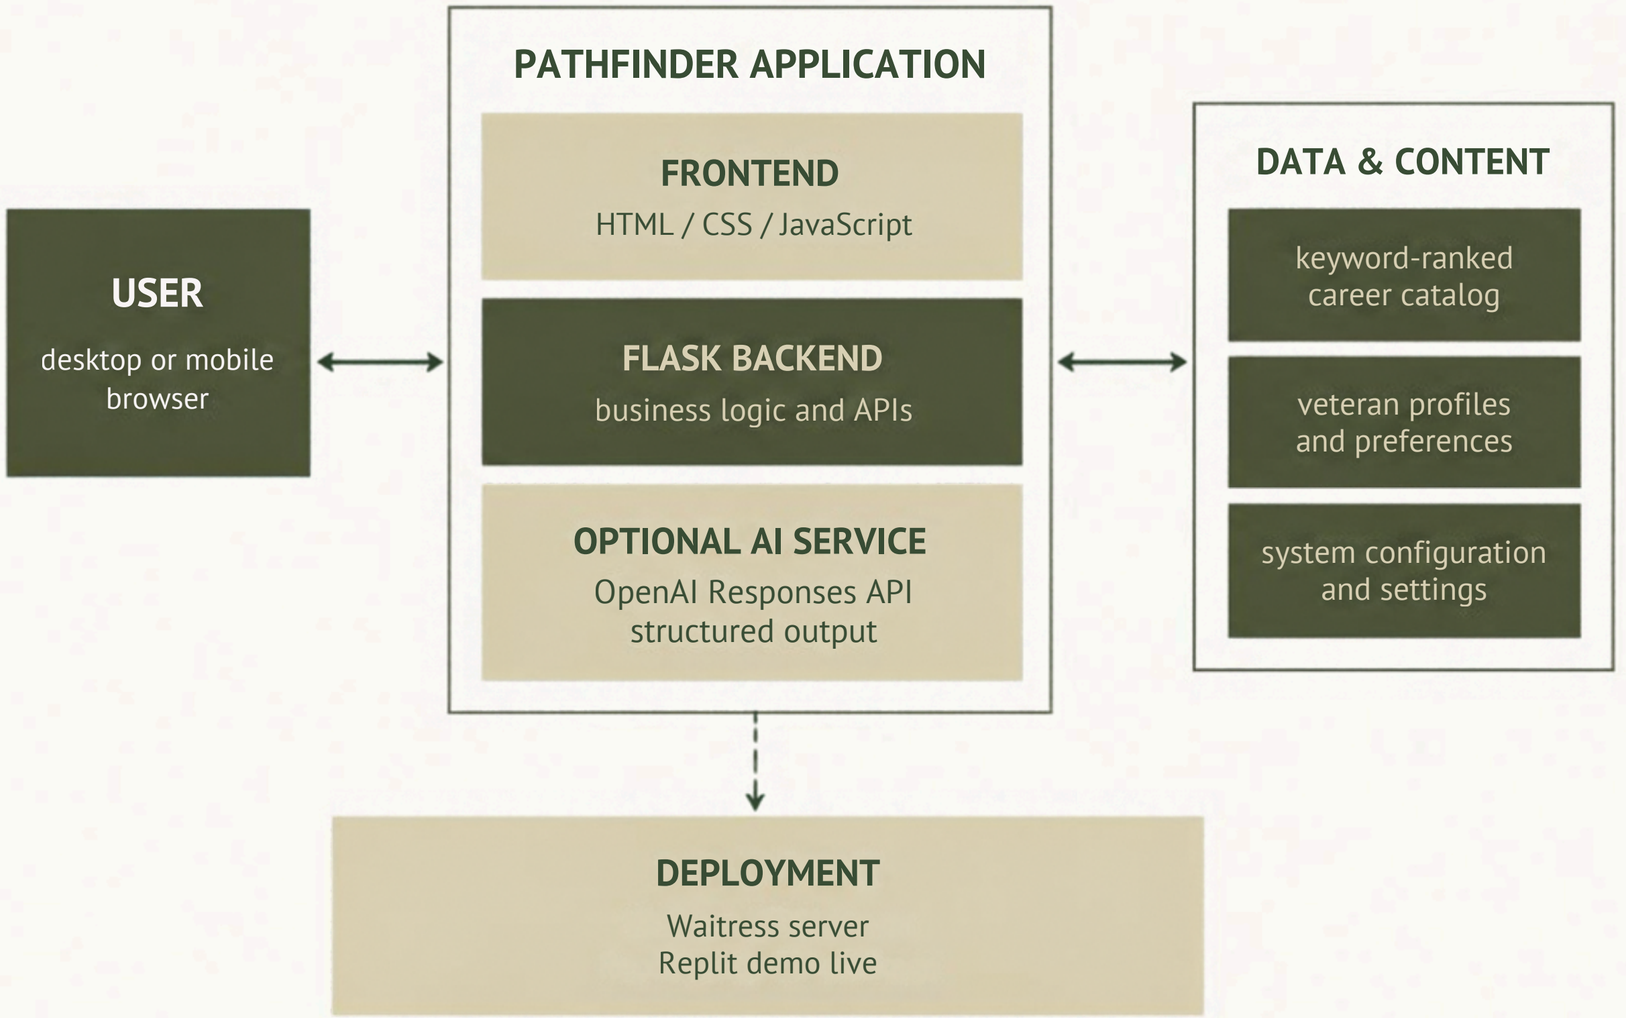

Framework applied to completed work and planned next steps.

1 IDENTIFY USE CASE	2 EXPERIMENT AND SELECT	3 ADAPT, ALIGN, AND AUGMENT	4 EVALUATE	5 DEPLOY AND INTEGRATE
Define career exploration scope aligned to veteran goals and needs.	Existing API model configured; live comparisons planned.	Task prompt and schema built. No fine-tuning or RAG.	Technical tests passed; counselor quality review planned.	Replit demo verified live. Paid AI validation pending.

6. MONITOR PLANNED METRICS

RELEVANCE → FACTUALITY → COST PER PLAN → FAILURES

Implementation and evidence

TECHNICAL CHECKS

10

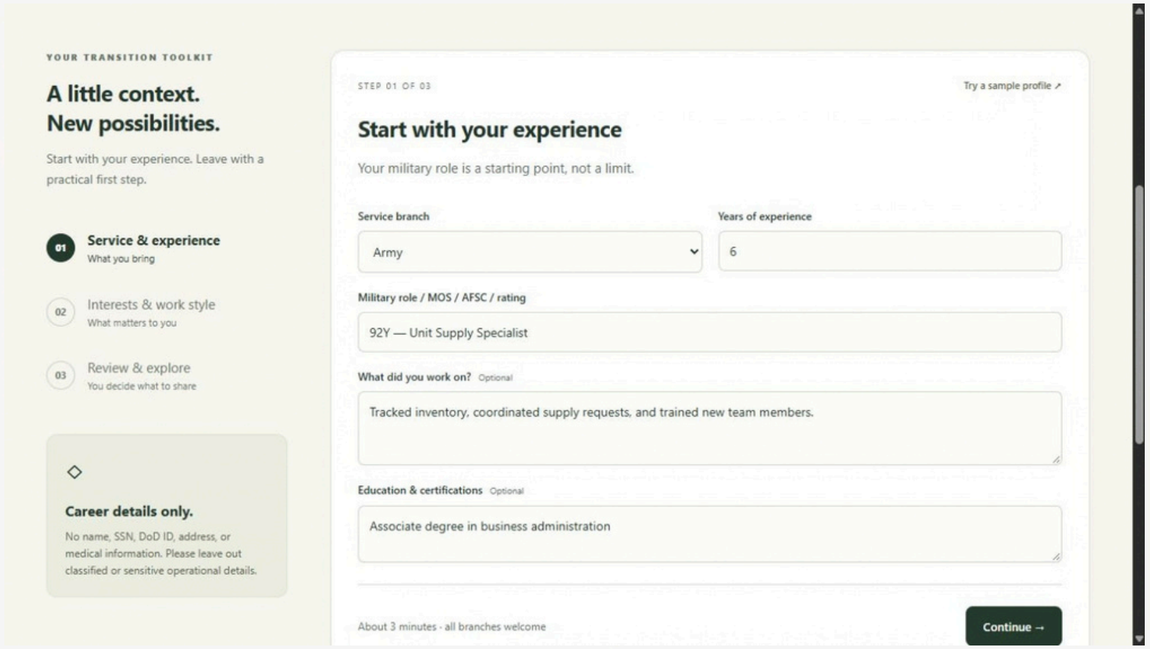

backend tests passing

Replit demo verified.
Live AI and user outcomes verified.

Application Considerations

Before public use: counselor-reviewed quality checks

Cost limits and shared session infrastructure

Reviewed privacy and retention controls

Next milestone: a supervised pilot with veterans and career counselors
